Background clarifying and exploring the issues

Personal web site 1997-2006: Earliest writing published at the personal web site, from circa 1998 to 2005. The first philosophy web page from 1999. <https://www.grlphilosophy.co.nz>

LinkedIn 2005-2015: Second stage published in LinkedIn, 2005-2016. www.linkedin.com/in/grahamlittle.

SSRN 2016 - present: During this second stage I wrote and self-published the foundation science in The Origin of Consciousness. 'Origin' as I call it, was accepted on SSRN mid-2016, and SSRN has accepted all subsequent work. www.ssrn.com/author=2572745.

Personal web site 1997-2006

Crucial early papers, published in the now defunct UNESCO Journal *impact of science on society*:

1. [Paper 1\) Social models: blueprints or processes?](#) Exploring the philosophy of social planning, comparing the *future blueprint view* of Marx, with the *future problem-solving view* of Popper.
2. [Paper 2\) Creativity and conflict in psychological science.](#) Presenting the divergent and failed positions in psychology. That all positions were based on an apt insight into people, but that any truly scientific view of ourselves had to integrate all of these insights into a single theory.

I regard this paper published in 1984 as the plan of action of what I intended to do. That is to resolve all underlying intellectual questions and build the first truly scientific general theory of psychology.

Other papers published at the www.grlphilosophy.co.nz, all written 1998-2005, must be regarded as my preliminary work on exploring the issues implicated in my aim of building the first scientific general theory of psychology.

NB: These papers listed for completeness. These papers are the foundation notes leading to the writing of "Origin", which was accepted on SSRN mid-2016.

SSRN: since 2016, exploring the consequences of the science

All the work on SSRN is exploring the application of the science, clarifying its explanatory power, the notion of consciousness for example, and carefully defining the method whereby the theory created

Study guide to research the spiritual model of humanity

1. www.spiritualmodel.com. Examine the structure of the intellectual position of the spiritual model of humanity, its depth and breadth. Note Item 15, and the attempt to engage with intellectual elite people to explore the advance in science. This attempt failed and people failed to reply and the since politically disparaged behind the scenes and complaints laid over the work.
2. Begin with the glossary and study guide. *Glossary and study guide to the spiritual model of humanity as the correct science of people (November 9, 2021)*. Available at SSRN: <https://ssrn.com/abstract=3913364>.
3. Consolidate understanding key issues of method. *Modern Methodology (September 24, 2018)*. Available at SSRN: <https://ssrn.com/abstract=3254017>.
4. Deepen understanding of how a single causal source can produce multiple complexities. The legacy of Thoms Kuhn and paradigm and normal science. *Evolution (January 22, 2023)*. Available at SSRN: <https://ssrn.com/abstract=4333700>
5. There are many papers on application, but one worthy of early consideration is *Future of Freedom Lies in Battle for Minds (April 5, 2023)*. Available at SSRN: <https://ssrn.com/abstract=4410169>. The battle for minds includes the use of reason, and the shift away from all forms of mysticism. The integration of science with spiritual depth and with the wonder of just to be.
